

TASK-MANAGER

LITE

POS Management Software

Point of Sale management software designed to suit venues that don't require complex stock control systems.

Links to the Quest Point of Sale hardware to create a total POS solution.

Manage all your products and selling prices from one easy menu.

Set up Category lists of products for quick menu selection at the POS.

Run your software on a laptop computer and only connect to the POS when you want to make changes or view sales reports.

Range of sales analysis reports to assist with managing your business.

Set up promotions in advance for selected dates and the prices will change for you.

Set up Happy Hour pricing on selected products for any day of the week.

Only view your favourite reports in the menu for quick access to key information.

Track sales by individual staff members with the use of wrist bands or other identification methods.

Monitor staff performance with staff clock-on/clock-off attendance reporting.

Balance Cash, EFTPOS, and any other media.

Run Management/Staff Accounts and Debtor Accounts and easily track all transaction history related to these accounts.

Upgrade at any time to the full Task-Manager modules to include stock control, Membership/Loyalty and a range of other features.

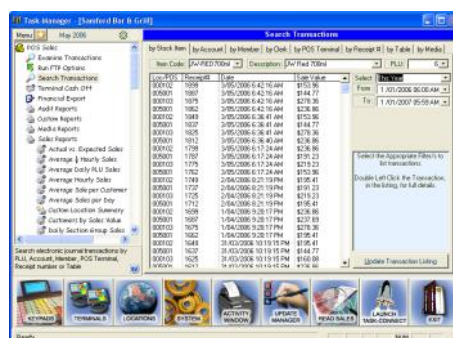

Report options

The report options menu gives you the ability to select any date range for the reports. You can preview, print, email or export the reports to Excel for further analysis.

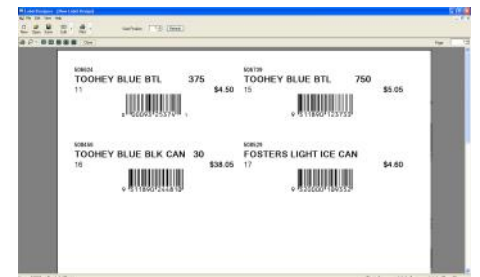

- Group and PLU Sales Reports
- Sales and customer counts for each day of the week.
- Hourly and half hourly sales breakdown over any date range.
- View customer counts and average spend per customer.
- See customer count breakdown by 5 different basket sales value ranges.
- Top selling products by quantity or value.
- Manage GST free sales for eat-in/take-away products.
- Full range of audit reports to track no-sales, cancelled sales and voids.

Search & Examine Transactions

Search for a specific sales transaction and double click on the line to see the full details of the sale. Useful for finding mistakes that have been made at the POS. Reprint any receipt number if required.

Bar Code Labels

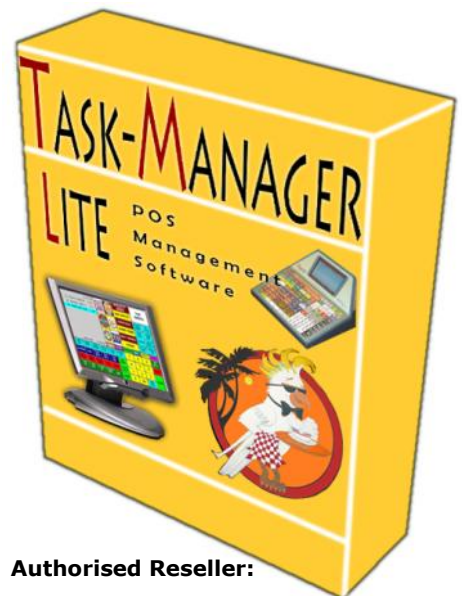

Print product or shelf price labels with bar codes on any label size using the label designer.
